1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 23 to 31 are, drawn to computer readable medium, classified in class 700, subclass 94.

II. Claims 1 to 22 and 32 to 36 are, drawn to method for estimating a head related transfer function, classified in class 381, subclass 310.

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because method for estimating a head related transfer function of group II can use any procedure for processing the system. The subcombination has separate utility such as different procedure can be used for processing the system of group II.
